

Augmented Reality applications – installation instruction

How to Install the APK on Your Android Phone

1. **Download APK** from source link.
2. **Copy the APK file** to your Android device (e.g., via USB cable, email, or cloud storage like Google Drive).
3. **Open the file** on your phone using a file manager app.
4. **Enable installation from unknown sources** (if prompted):
 - a. Go to **Settings > Security > Unknown Sources**
 - b. Enable the option to allow installation from external sources.
5. **Confirm the installation** and wait for it to finish.
6. **Launch the app** from your app drawer or home screen.
7. **Print the appropriate markers (images)** or **display** them in any screen, point the camera at the marker to see interactive content.

Important Note About Markers

- Different app versions or projects may **use different markers**.
- Always check the instructions for your specific app to see **which markers are supported**.
- If a marker doesn't work:
 - Try using a different one.
 - Make sure the marker is **printed correctly**, flat, and **well lit**.
